

Professional Summary

SAP Development Architect and SAP BTP Certified Solution Architect with 19 years of experience delivering large-scale enterprise SAP solutions across banking, retail, and government sectors, including high-volume and performance-critical applications.

Strong hands-on experience in SAP S4HANA using ABAP on HANA including CDS, AMDP, and RAP, with focus on scalable and optimised solution design for large and complex systems. Delivered measurable impact through large-scale processing and optimisation, including significant runtime reduction in enterprise systems.

Hands-on with SAP Business Technology Platform including CAP through project work, with additional exposure to Integration Suite, event-driven patterns, and AI based workflows through proof-of-concept implementations. Developed event-driven and AI-assisted solution prototypes, including a Node.js-based MCP server to expose SAP RAP OData services as controlled tools, enabling AI-assisted execution of business tasks without direct SAP GUI interaction.

Active SAP Community contributor, blogger, and TechEd speaker with multiple SAP certifications and a granted patent [US10304013B2](#). Experienced in collaborating with cross functional teams, contributing to solution design discussions, and supporting end to end delivery of SAP projects.

Academic Credentials

- Master of Business in Information Systems @ Victoria University of Technology (Australia), December 2005
- Bachelor of Engineering in Computer Science @ J.N.T University (India), April 2003

Experience

SAP Australia – Contractor, Sydney, Australia	Mar 2025 – Nov 2025 & Jan 2026 - Current
DyFlex Solutions – Contractor, Sydney, Australia	Nov 2024 – Feb 2025
SAP Australia – Contractor, Sydney, Australia	Apr 2018 – Sep 2024
SAP Labs India Private Ltd, Bangalore, India	Mar 2012 – Jan 2018
Logikal Consulting (Pty) Ltd, Johannesburg, South Africa	June 2011 – Jan 2012
Deloitte, Hyderabad, India – Contractor thru ANE Staffing Solutions	Nov 2010 – May 2011
IBM India Private Ltd, Hyderabad, India	May 2010 – Oct 2010
Enteg InfoTech Private Ltd, Bangalore, India	Jul 2007 – May 2010

SAP Certifications

- [SAP Certified Professional - Solution Architect - SAP BTP\(P BTPA 2408\)](#)
- [SAP Certified Development Associate - SAP HANA Cloud 1.0\(C HCDEV 05\)](#)
- [SAP Certified Associate - Backend Developer - SAP Cloud Application Programming Model](#)
- [SAP Certified Development Associate - SAP BTP Extensions with SAP Cloud Application Programming Model\(C CPE 14\)](#)
- [SAP Certified Associate - Integration Developer\(C CPI 2404\)](#)
- [SAP Certified Associate - SAP Fiori Application Developer\(C FIORD\)](#)
- [SAP Certified Associate – SAP Build Developer \(Low-Code/No-Code\) \(C LCNC 2406\)](#)
- [SAP Certified Development Associate – SAP HANA 2.0 \(C HANADEV 13\)](#)
- [SAP Certified Development Specialist - ABAP for SAP HANA 2.0 \(E HANAABW 18\)](#)

Blog Posts @ SAP Community Network

Authored blog series on SAP BTP, event-driven architecture, and AI integration, covering CAP-based applications, real-time processing, messaging integration, and AI-assisted workflows. Demonstrated practical exploration of SAP technologies including Event Mesh, Integration Suite, SAP IRPA, Kyma runtime, and AI services through proof-of-concept implementations.

- [Event Driven SAP CAP on Kyma with Agentic AI and UI Auto Refresh](#)
- [Event Driven Integration Using SAP Integration Suite, Solace, HANA DB, and OpenAI Validation](#)
- [Automated Job Screening Using SAP Integration Suite, Adzuna, and ChatGPT](#)
- [Multi-Service PAYG Application: SAP BTP Kyma Runtime, Docker, Ethereum, SAP AI Business Services](#)

SAP Core Technical and Architecture Expertise

- **Core SAP Engineering**
 - o SAP ABAP on HANA (CDS, AMDP, RAP)
 - o ABAP OO, RICEF, Web Dynpro ABAP
 - o SAP HANA Platform Native Developments
 - o SAP Fiori (CDS, Annotations)
- **SAP BTP**
 - o SAP BTP CAP (project experience)
 - o SAP BTP Integration Suite (exposure and prototyping)
 - o Event-driven patterns, Event Mesh, Kyma runtime (proof-of-concept)
- **Architecture and Performance**
 - o High-volume data processing and performance optimisation
 - o Clean core and S/4HANA transformation, including custom code remediation and cloud readiness
 - o Code pushdown, SQL optimisation, and system modernisation
- **AI (Exploration)**
 - o Machine learning and AI-based workflows (proof-of-concept)
 - o SAP HANA PAL and R-based modelling
 - o AI-assisted automation patterns
- **Programming and Tools**
 - o Languages: Node.js, Python, R
 - o Frontend: JavaScript, HTML5, SAP UI5
 - o Databases: SAP HANA, MongoDB, Neo4J
 - o Tools: SAP BAS, Eclipse, Visual Studio Code, Git

Hackathons

- Winner of SAP event, **Google TensorFlow IoT Challenge** – Machine learning image classification application was built using Python and Google TensorFlow.

- Finalist of SAP event, 'What the Hack 2.0!' - Designed and built, a click free – *Real Time Speech and Predictive Analytics* application, for differently enabled people using SAP HANA. [Patent - US10304013B2](#).

Projects

SAP Australia – Commonwealth Bank, Australia. Mar 2025 to Nov 2025 & Jan 2026 – Current

Project Description & Responsibilities:

Supported CommBank's SAP Transactional Banking (TRBK HANA) modernization initiative as part of the bank's core-banking transformation program. Contributed to code remediation and performance optimization, resolving legacy issues and translating DB2 query hints to HANA equivalents for efficient execution on the new platform.

Built a Node.js-based MCP server to expose SAP RAP OData services as controlled tools, enabling AI-assisted execution of business tasks without direct SAP GUI interaction.

Proposed, designed, and implemented a data scrambling solution for SAP S/4HANA using ABAP, CDS Views, and AMDPS, replacing the legacy process for preparing non-production environments.

Reduced runtime from 240 hours to 6 hours (97% improvement) through full automation, delivering a scalable and stable framework for system copy and testing processes.

DyFlex Solutions, Australia. Nov 2024 to Feb 2025 – Senior SAP Technical Consultant

Project Description & Responsibilities:

Worked on S/4HANA transformation projects for clients including Roy Hill and Syntax. Remediated custom code for S/4HANA compatibility, replaced obsolete objects, and adapted enhancements to align with clean-core and cloud standards. Developed new artefacts to support migration and ensure system readiness.

SAP Australia – Woolworths, Australia. July 2022 to Sep 2024 – Development Architect

Project Description & Responsibilities:

Led SAP CAR UDF custom developments at Woolworths, designing scalable solutions to support forecast data calculations and machine learning reporting. Built multiple high-volume custom objects using AMDP, CDS, and ABAP to process more than 40 billion records across several partitioned tables within the same program. Focused on performance optimization through Code Inspector, SQL Trace, AMDP Trace, and PlanViz, refactoring existing logic with CDS and AMDP to meet S/4HANA and cloud coding standards.

SAP Australia – Queensland Health, Australia. June 2023 to August 2023 – Development Architect

Project Description & Responsibilities:

Contributed to development of Digital Passport Application built using SAP BTP CAP model, used to consolidate employee information from SAP ECC and QHealth Platform.

SAP Australia – Department of Corrections, New Zealand. September 2022 to June 2023 – Development Architect

Project Description & Responsibilities:

Worked on SAP Procurement developments as part of project upgrade preparation phase. Built Custom Analytical Fiori Apps, Activating Fiori Apps and assigning roles to users for accessing Apps, Leveraging the key user (in-app) extensibility to apply changes to standard Fiori Apps using Adapt UI and other BAU related developments.

Evaluated custom code and objects using ABAP Call Monitor (SCMON) and SUSG, and used Custom Code Migration App for scoping, remediation, and optimisation.

SAP Australia – Services Australia, Australia. Nov 2018 to June 2022 – Development Architect

Project Description & Responsibilities:

Development Architect for Services Australia Project. Contributed to the preparation of Vision and Scope documents. Designed and built a solution to process large volume of Financial Instruction Documents data using CDS based BOPF, code push down using AMDP and Gateway/OData/CDS for building APIs, ABAP RESTful Apps on S/4HANA environment. Extended the solution to process Real Time Payments. Built other associated solutions using Machine Learning to identify payment anomalies. Contributed to core application logic for additional solutions.

SAP Labs - Stockland, Australia. March 2017 to Jan 2018 & April 2018 to Nov 2018 - Development Architect

Project Description & Responsibilities:

Stockland uses Project and Portfolio Management and REFX modules built on SAP S/4HANA. BW Integrated Planning was used as a solution to Forecast and Plan financial data. As part of the solutioning, Business data is segregated into different ADSO, so that BW queries and BW Integrated Planning applications can be built. These applications used SAP Analysis for Microsoft office for planning and forecasting the data and to write back new information to ADSOs.

Participated in the development of ABAP and HANA based BW-IP Planning functions, CDS view and AMDP objects, to completely leverage HANA database. Built ADSO using planning function to read and write data via SAP Analysis for Microsoft Office. Designed and built backend code for Free Style SAP UI5 application using OData & CDS views to maintain Global Factors Application data. Built end-to-end SAP FIORI Applications with OData Annotations. Built Analytical applications using CDS/OData Analytical Annotations to check the technical possibility and usability of BW queries and CDS based queries.

VBA code for implementing SAP analysis for office functions to calling planning functions. Implemented White Papers in BW-IP and involved in performance improvements by code push down to HANA.

SAP Labs – Mohawk (Side Match Project). January 2016 to July 2016 - Senior Developer

Project Description & Responsibilities:

This project is a data science with machine learning project in Predictive Analytics Area. Mohawk is one of leading carpet manufacturer and it is critical in terms of cost to identify faulty carpets. A solution was delivered to provide a predictive application to identify the quality of the carpets.

Worked on constructing and formatting sensor data, ensuring data quality and preparing inputs for machine learning models.

Worked on development of building the ML models in PAL (Decision Tree, Confusion Matrix), APL (Regression) and R (Random Forest) language algorithms. Evaluated the models by using test data and used the confusion matrix to determine the performance of the model. Retrained the models by dropping variables and applying the models on the new data and stored the results. Built SAP HANA tables, stored procedures, XSJS, XSODATA, Functions for building business logic and to expose to SAP UI5 applications. Followed CRISP-DM Methodology for this project.

SAP Labs – Mosaic (Minefield Visualizations). Aug 2015 to Jan 2016 - Senior Developer

Project Description & Responsibilities:

Mosaic is one of the leading Phosphate miners and it was very critical for the business to have an integrated solution about mining and maintaining the boreholes. This project is a custom SAP HANA native development aimed to deliver an application which can cater all the needs of business, such as geographical location of the boreholes, status of the boreholes, mined status, alarms, service tickets.

All the required data was pushed to SAP HANA database from other databases by Mosaic's team. Participated in the development of SAP HANA (Server-side scripting & DB Artefacts) and supported SAP UI5 developments. Built stored procedures to combine the necessary data by linking the data flowing from different databases based on the business

requirements and exposed the data via OData and XSJS. Explored SAP HANA platform for developing different kind of artefacts and finally chose the best fit for the project.

SAP Labs – BMW (GSM). September 2014 to March 2017 - Senior Developer

Project Description & Responsibilities:

This project involves in the development of a custom add-on solution for indirect procurement in SRM area. Participated in the development of building custom solutions for indirect scenarios which comprises of various ABAP developments and Web Dynpro ABAP artefacts. Enhanced standard contract and purchase order Web Dynpro ABAP applications. Built custom Web Dynpro ABAP application for suppliers about the location goods.

An automated tool for creating Contracts and Purchase Orders using Shopping carts. Designed and built artefacts using ABAP programming model for SAP S/4HANA. Participated in redesigning existing solutions by pushing the code to database, for improving the performance of the applications. Enhanced and reused Office Open XML based code for downloading RFx responses and contracts.

SAP Labs - BHP Billiton (UI Logging). March 2012 to August 2014 - Senior Developer

Project Description & Responsibilities:

This project involves in the development of a custom solution for SAP UI Logging on top of SAP RCS product LOGWIN. SAP product stores user actions and selection screen values on transaction codes and BI reports. The custom solution transfers the logs generated by SAP product to external log. This external log will be used for evaluation and analysis. Participated in the development of complete custom solution to evaluate the logged data by transferring the log into meaningful data, mapping data to user actions, for the transaction codes which are configured.

[Blog: SAP Product and Custom Solution](#) – SAP UI Logging.

First 5 years work in a Nutshell

During this tenure, while working for the following companies, involved in various SAP project implementations including custom development projects for clients such as Standard Bank, Deloitte Support Services, Deutsche Bank, WIPRO Technologies (with **SAP Labs** Team), Quinnox, Suzlon, Nation Wide Building Society (with **SAP Labs** Team).

- [Logikal Consulting – Standard Bank \(REFINE GL Project\). Jun 2011 to Jan 2012 – SAP ABAP Specialist](#)
- [ANE – Deloitte \(Large Client Project\). Nov 2010 to May 2011 - Senior Web Dynpro ABAP Consultant](#)
- [IBM – Deutsche Bank Project. Jun 2010 to Oct 2010 – Application Developer](#)
- [Enteg Infotech – Jul 2007 to May 2010 - Senior Developer](#)

Roles & Responsibilities:

Participated in the development of ABAP, ABAP HR & Web Dynpro ABAP artefacts such as RICEF, Infotypes, common framework classes for business functions, dashboard reports, custom Web Dynpro ABAP applications for business processes, enhancement of standard Web Dynpro ABAP objects, building custom solutions and consuming proxies of enterprise services of the business requirements across various SAP ERP modules such as SD, MM, FI, HR, Banking, ReFX.

Part of the core technical architecture and designing team, requirement gathering, designing, and reviewing functional and technical specifications. Assigning, tracking, monitoring the development objects and coordinating with the development team. Accessing the technical possibility for the developments, finding alternate solutions, identifying the issues, redesigning, and developing quality artefacts. Developed and ensured that the requirements are as per customer needs by showcasing the developments. Testing and supporting the projects before/after Go Live.

Achievements, Appreciations, Awards

- Winner of Google TensorFlow IoT Challenge – 2017 at SAP Labs.
- What the Hack 2.0! Finalist. Presented Real Time Speech Analysis Application at SAP Labs.
- Nominated for THE TITAN - CD BLR LOB 2016 Awards, at SAP Labs.
- Multiple awards for Outstanding performance awards in BHPB project by SAP
- Received Peer-to-Peer awards in 2012, 2013 & 2015 in SAP Labs.
- Received an Appreciation Note from “Deloitte” for the performance and technical competency shown during the implementation of Large Client Project.
- Active Contributor Silver at SAP Community Network Forums in SAP HANA, SAP ABAP for SAP HANA, SAP ABAP, and Web Dynpro ABAP Areas.
- Received an Appreciation Note from “ENTEG” for the performance and commitment shown during the implementation of SUZLON Project in SAP HR (PD).
